# OUR PACKAGING FACTORY

Our factory is built and operated to the highest quality standards to ensure the production of products that meet the strict requirements of the Japanese market. This factory was operated in December 2008 in Binh Xuyen industrial park, Vinh Phuc province, Vietnam; with a scale of 50,000m<sup>2</sup>, factory area is 26,000m<sup>2</sup>. We joined Flexible Intermediate Bulk Container Association in October 2012 and has full certificates of ISO 9001:2015, ISO 14001:2015 (received in June 2018), Certificate to ensure the performance of bulk soil containers in terms of resistance weatherproof (product used to store nuclear radioactive waste in Japan). With 667 workers (as of June 2023), working 3 consecutive shifts, we always ensure an average capacity of 200,000 products per month.

# CERTIFICATE AND STRICT PROCESS WHEN CREATING PRODUCTS

# About us

Starting in 1996, it is a factory specializing in packaging processing for Vietnam's rapidly growing agricultural industry and the wave of Japanese businesses investing in Vietnam. K-Packing gradually develops to become a leading enterprise in the packaging materials industry in Vietnam. K-Packing's products satisfy demanding markets such as Korea and Japan. With a green and environmentally friendly trend, K-Packing factory continuously improves products to implement a green, emission-free production process, using renewable energy and materials (accounting for 70 % and gradually plan to reach 95% of the entire factory before 2028) Due to its scale and ability to optimize inputs as well as good production, K-Packing always has the best prices on the market and ensures product quality. Products always satisfy customers around the world.

# PURCHASING PROCESS

## Step 1: Confirm requirements and quote products

determine requirements, expected budget, receiving plan, sample selection, Confirm quotation and delivery time

## Step 2: Contract

finalize basic terms such as quantity, specifications, unit price per product, payment terms, deadline and delivery method

## Step 3: Finalize sample products

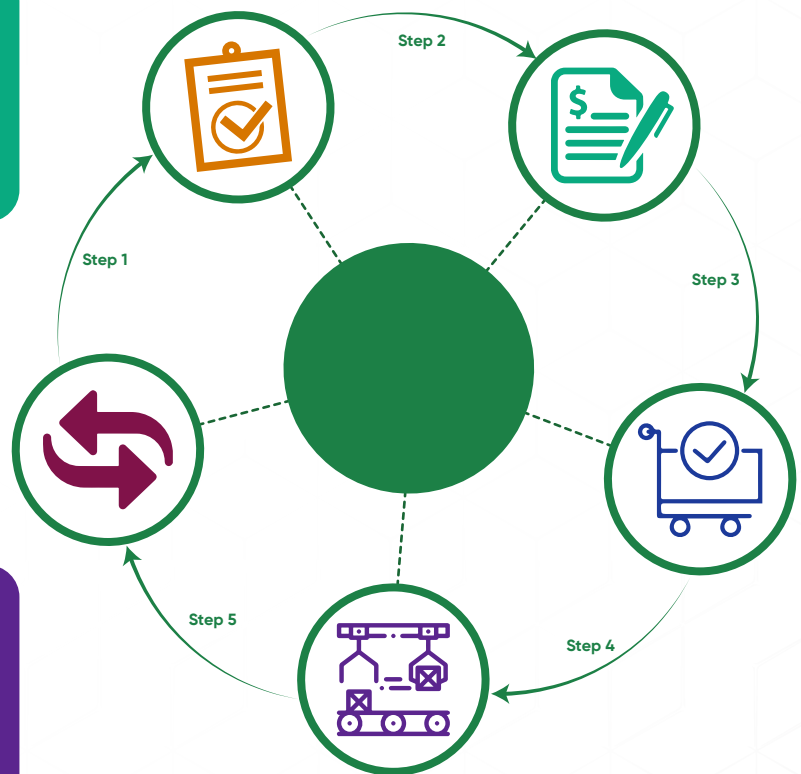

Produce sample products and approve sample products

## Step 4: Mass production

Mass production according to quantity and product specifications, ensuring compliance with the agreed terms in the contract

## Step 5: Transfer

Transfer products to customers according to the method agreed in the contract, provide after-sales care and plan for the next order.
